

DESIGNER SOURCING

A tailor-made service for design professionals

design centre
LONDON

DESIGNER sourcing

A bespoke service is now available to support busy design professionals.

Accessing the vast resources at Design Centre, Chelsea Harbour, the Designer Sourcing Service can track down specific products on every floor. Working in collaboration with interior designers, this specialist service will save you time by focusing on the portfolio of talent on site.

Before embarking on a targeted search, considerations will include content, colour, texture, size and shape, as well as the needs and budget of the client. With an in-depth knowledge of 120 showrooms and over 600 international brands, the Designer Sourcing Service is well placed to offer design solutions for busy professionals.

Expect a carefully chosen selection that is up-to-date with all the latest launches, as well as representative of mainstay and bespoke designs. Ask the team to find just what you need – they can source for all your projects and send samples quickly and efficiently.

“Being able to call upon their experience and knowledge is an invaluable resource. Caroline is an amazing asset and I'd encourage everyone to give the Sourcing Service a try”

Leigh Anderson, founder of Lax Interiors
